PROFESSIONAL SUMMARY

Computer Engineering graduate and Full Stack Developer with hands-on experience in building scalable web applications and cloud-native solutions. Skilled in React.js, Node.js, MongoDB, AWS, Docker, Kubernetes, Terraform, and Jenkins, with a strong foundation in software development and deployment.

TECHNICAL SKILLS

Languages: JavaScript, HTML/CSS, SQL, Python

Frontend: Reactjs, Redux, React Router, Tailwind CSS, Bootstrap, ChakraUI, DaisyUI

Backend and APIs: Nodejs, Express.js, REST APIs, JWT Authentication, Firebase

Cloud and Devops: AWS, Google Cloud, Docker, Kubernetes, Terraform, Jenkins, Netlify, Vercel

Databases: MySQL, MongoDB, PostgreSQL

Tools and Platform: Numpy, Scikit-Learn, Matplotlib, Pandas, Git, Amazon Web Services (AWS), NPM, Github, Visual Studio.

EDUCATION

Rizvi College of Engineering

Bachelor of Engineering – BE Computer Science [8.20]

2022 – 2026 | Bandra, Mumbai

WORK EXPERIENCE

PRODIGY INFOTECH | Front-End Web Development Intern

Jan 2025 – Mar 2025 | Mumbai

- **Build a personal portfolio site:** Designed and launched a personal portfolio using ReactJs to exhibit projects and skills, utilizing modern web technologies.
- **Weather-vista:** This is a sleek and responsive weather web app built using HTML, CSS, and JavaScript. It provides real-time weather updates for any location, displaying key details like temperature, humidity, wind speed, and weather conditions.
- **Developed small-scale web applications:** Created multiple mini web apps, enhancing coding skills and deepening knowledge of web development frameworks.

PROJECTS

CyberSentinel | Phishing URL Detection | Python • Flask • Random Forest • Virustotal API

Nov 2025 – Apr 2026

- Built a full-stack social networking platform for developers featuring user authentication, profile management, connection requests, and real-time feed system with swipe functionality.
- Implemented Redux for state management, JWT-based authentication, and RESTful APIs with MongoDB for efficient data handling and user session management.
- Designed responsive UI components with mobile-first approach, integrated CORS handling, and developed features including friend connections, request system, and search functionality.

EngageDev – Developer Networking Platform | React.js • Node.js • Express.js • MongoDB • Redux

Sept 2025 – Dec 2025

- Built a full-stack social networking platform for developers featuring user authentication, profile management, connection requests, and real-time feed system with swipe functionality.
- Implemented Redux for state management, JWT-based authentication, and RESTful APIs with MongoDB for efficient data handling and user session management.
- Designed responsive UI components with mobile-first approach, integrated CORS handling, and developed features including friend connections, request system, and search functionality.

Yummigo – Food Ordering Web App | React.js • Redux • Tailwind CSS • HTML • Swiggy API

May 2025 – Jun 2025

- Designed and developed a responsive food delivery application that enables users to **browse restaurants, search/filter dishes, add items to cart, and place orders** seamlessly.
- Integrated **Redux** for efficient state management and implemented live search functionality using **Swiggy's public API**.
- Focused on delivering a clean UI/UX, optimized performance, and cross-device compatibility.

Image Classification System | Python • TensorFlow • Keras • OpenCV • NumPy • Matplotlib

Nov 2025 – Dec 2024

- Built a deep learning-based image classification model using TensorFlow and Keras to classify images into multiple categories.
- Implemented CNN architecture with data preprocessing, augmentation, and normalization for improved accuracy.
- Trained and evaluated the model using real-world image datasets and visualized performance metrics.
